

I have made a conscience decision to subscribe to XM Radio because of the programming options such as: commercial free music, traffic updates, weather predictions, and the customer service that XM Radio offers. Because I pay \$10 per month, I believe that the XM Radio service should be allowed to offer it's customers the services resuested most.

If I chose to listen to free, public radio, then the NAB should have a say in programming. However, since I have purchased the required components and pay monthly for service, the NAB needs to respect XM Radio's right to give the customers the desired programming.

I am a firm believer in the First Ammendment and I do support it. I am urging the policy makers to support XM Radio's quest to provide customers, like myself, the services that I desire because I now have a choice in radio coverage, and I choose to pay for commercial free services including music, news, weather, and traffic updates.

Please allow more than a million other customers like me, who believe the freedom of choice is more important than the overpowerful and controlling National Association of Broadcasters, to have a voice and continue to allow XM Radio to offer its customers what they want. Please reject the NAB's petition 01-160 and allow the First Ammendment to continue to flourish in teh United States of America.

With much appreciation,
Gina Ferraro
